AnglerCatch, a Free Fishing app to enhance fishing and conservation

Want to enhance your fishing effort with a new fishing app? Then you should attend this AnglerCatch seminar. AnglerCatch, the electronic recording catch and effort software developed by RISAA and its partners Rhode Island DEM and Harbor Light Software is now available in the app store to be downloaded for free on smartphones or tablets. Learn how this app aims to compliment Marine Recreational Information Program (MRIP) data while providing a historical record of your catch that could enhance your fishing. The aim is to have you download the app before you leave the seminar.
